Dear Sirs,

We represent Olevsky Porcelain Factory, a manufacturer of low-voltage porcelain insulators (Olevsk, Zhytomyr region, Ukraine).

Our Factory is the Ukraine's 100-year electrical engineering leader specializing in the manufacture of a wide range of technical ceramic insulators of subgroups C110 and C111. Our product range numbers more than 100 products used in various fields of national economy.

The product use areas may be classified as follows:

- - insulators for domestic and industrial heating devices and spirals (scaly and cylindrical beads);
- - insulators for furnaces (bushings, tubes, male/female joint kits);
- - insulators for tubular electric heaters, extruder heaters and injection molding machine heaters;
- - isolators for thermocouples;
- - insulators for external wiring and incubators;
- - insulators for traction motors, trolley carriers, resistors, resistor units, as well as for insulation of live parts of lifting and crane equipment;
- - railway insulators (used in locomotives, metropolitan trains);
- - isolators for industrial knife fuses;
- - acid-resistant packing (for filling in the columns at chemical plants);
- - insulator tubes (for various purposes, heating elements, insulation for straight sections of spirals and current terminals);
- - ceramic bases for sockets and holders;
- - insulators for welding (welding cables, backup plates);
- - insulators for transmission lines (0.4 kW), telecommunication, telephony and alarm lines;
- - insulators for fumigators;
- - antenna and feeder insulators;
- - insulators for various heating devices;
- - broad spectrum customized insulators (including special);

Today you may see some types of our products on our web sites: www.ozef.com.ua and www.ceramics-for-heaters.com

Full E-catalogues of our products are available at your request.

We are interested in establishing lasting economic relations with consumers of our products in Poland and Eastern Europe, as well as in the providing of intermediary services and communication with our potential European corporate customers.

Our potential ultimate customers may be:

- tubular electric heater manufacturers;
- manufacturers of electric coils, hotplates, refrigeration and food electrical equipment, as well as household and industrial appliances;
- electric locomotive and urban electric transport construction, maintenance and service companies;
- crane and lifting equipment construction, maintenance and service companies;
- manufacturers of industrial fuses, control cabinet switches and wiring;
- companies manufacturing and installing wire lines, alarm and power lines (up to 1 kV) ;
- electrical sockets, holders and light fitting manufacturers;
- other related businesses.

We are awaiting your favorable decision to start cooperation with us.

Sincerely Yours,
Commercial Director of Olevsky Porcelain Factory Ltd.

Mr. Eugeniy A. Klochko
