

ON THE EDGE OF LIGHT AND  
SOUND TECHNOLOGIES

There are many companies that think they are able to make sound and lighting system at the stadium – we are those who did it many times.

There are many ways to meet FIFA requirements to sound system and the only one way to have reliable sound system that would last for years - this is to do it right!

In this presentation we would like to share with you our VISION

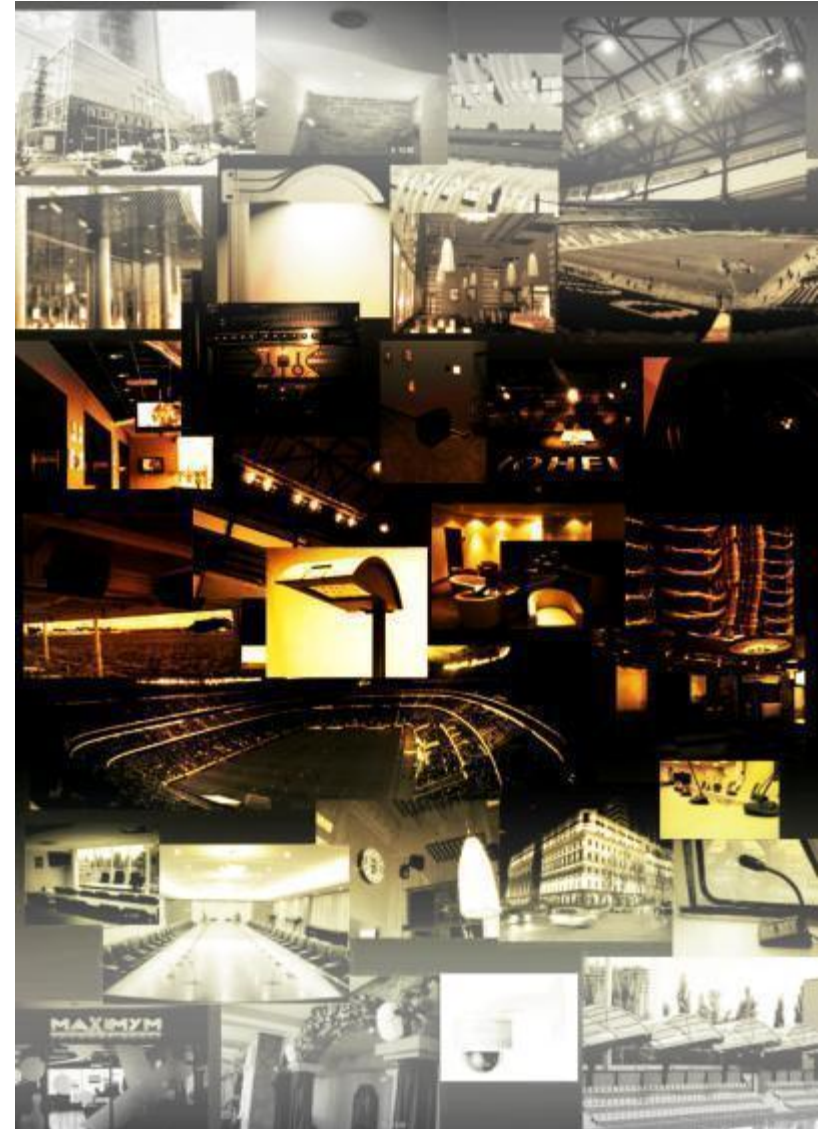

---

**"AVT & Installation Limited" - project design and installation company in the field of sound and lighting solutions for sports arenas and other real estate objects. Our company has 15 years experience of global successful execution of installation works of various complexity. We have representative offices in England, Ukraine, Russia and Brazil.**

We consult, design, install and commission the following types of projects:

- public sound systems (sports arenas, shopping and entertainment centres, nightclubs and discos)
- public lighting systems (sports arenas, shopping and entertainment centres, business centres)
- architectural lighting and other types of lighting systems
- video information systems
- surveillance and industrial television
- structured cable network and telephony
- satellite and cable television networks
- interactive hotel television systems
- conference systems
