

OJSC "Turboatom" - is the main scientific organization of the Ministry of Industrial Policy of Ukraine of power machine building and it is a part of leading turbine building firms of the world.

The enterprise specializes in production of steam turbines for:

- Thermal Power Plants (TPP);
- Nuclear Power Plants (NPP) and Heat and Power Plants (HPP);
- Hydro turbines for Hydro Power Plants (HPP) and Hydroelectric Pumped Storage Power Plant (PSP);
- Gas turbines and Combined-Cycle Plant (CCP) for TPP
- Other power equipment.

Manufacturing capabilities allow to output, per year, steam and hydro turbines with designed capacity of 8 million KW and 2 million KW, accordingly.

Turbine manufacturing is carried out in closed cycle: starting from designing and research work up to manufacturing, assembling, testing and shipping of turbines.
